

Software Development

Software Engineering

Problem Solving

Web Technology

- Current student of Software Engineering Technology at Centennial College
- Bachelor’s degree in computer science, providing a strong academic foundation in programming, algorithms, databases, AWS, GCP and software development.
- Knowledge of Java, JavaScript, HTML, CSS, SQL, and Linux/Unix through academic coursework and hands-on assignments.
- Experience developing software and web-based projects as part of academic coursework, including designing, coding, testing, and troubleshooting applications.
- Familiar with Oracle SQL and database concepts, including creating tables, applying constraints, and writing SQL queries.
- Experience working with Linux/Unix command-line tools, file management, permissions, text processing, and basic shell commands.
- Strong problem-solving and analytical skills with the ability to learn recent technologies and apply them to practical problems.
- Strong communication and teamwork skills developed through working on multiple academic projects and collaborating with classmates.

Education

Software Engineering Technology

Centennial College, Toronto, Ontario

GPA: 4.0

Key Courses:

Software Engineering Requirements

Web Interface Design

Unix/Linux Operating Systems

Software Engineering Fundamentals

Programming1 (Python)

Introduction To DB Concepts

January 2026 - Present

Expected graduation July 2028.

Computer Science

Lebanese International University, Beirut, Lebanon

July 2009 – July 2013

Project Work

Database Development Project

Centennial College, Toronto, Ontario

Designed and created related database tables using Oracle SQL.

Applied primary keys, foreign keys, and other constraints to maintain data integrity.

Developed SQL queries to retrieve, filter, group, and organize database information.

Used SQL Developer to create and test database structures and queries.

May 2026- September 2026

Linux/Unix Administration & Command-Line Project

Centennial College, Toronto, Ontario

Utilized Linux/Unix command-line tools to create and manage files and directories. Worked with file permissions using commands such as chmod and practiced managing access for different users.

Used command-line utilities include grep, find, sed, awk, cat, and vi/nano to search, process, and manipulate text and files.

May 2026- September 2026

- Applied Linux skills to troubleshoot file-management and text-processing tasks in a command-line environment.

Software Requirements Specification Document

May 2026- September 2026

Centennial College, Toronto, Ontario

- Collaborated in a team using Agile practices for the development of an SRS document for a web app, MatchMyHome, that matches potential landlords and tenants abiding by specific security measures.
- Created UML diagrams and Cantt charts, as well as functional and non-functional requirements sections.

Web Design (CSS, HTML, JavaScript)

January 2026- September 2026

Centennial College, Toronto, Ontario

- Designed a responsive, user-oriented website to highlight services for sale.
- Created scrolling image galleries, contact forms and responsive designs.

Professional Development

- **AWS Cloud Practitioner Essentials (AWS Skill Builder)**

In Progress

Related Work Experience

Technical Engineering Support

October 2022 – December 2025

Mobileum Inc., Lisbon, Portugal

- Analyzed application and system logs using Linux command-line tools to identify errors, investigate issues, and retrieve critical technical information.
- Developed and tested Bash and Python automation scripts, with AI-assisted development, to automate log analysis and extract relevant information into Excel and CSV formats.
- Used Linux terminal commands and scripting techniques to improve the efficiency of repetitive technical support and data-retrieval tasks.
- Connected to technical environments securely through VPN while following established security measures, policies, and access procedures.
- Used GitHub to manage and collaborate on scripts and technical work.
- Used JIRA and Atlassian to track issues, document technical information, and follow support workflows.
- Completed security and technical training to understand company policies, secure access practices, and procedures for handling technical information.
- Troubleshoot technical issues by reviewing logs, gathering relevant information, and communicating findings with the appropriate teams.

Web Developer (Remote)

July 2020 – September 2022

Points Information Technology, Riyadh, Saudi Arabia

- Developed and maintained websites using WordPress, focusing on functionality, usability, and overall website presentation to meet project and client requirements.
- Worked with HTML and CSS to customize website layouts, content, and visual elements.
- Troubleshoot website issues and made updates to improve functionality and user experience.
- Collaborated with team members to understand requirements and implement website changes.
- Managed website content and performed updates while ensuring pages remained organized and functional.
